Work Experience

Media Manager

Lombard Church of the Nazarene - Lombard, IL (Hybrid)
July 2021 to Present

I currently work with the audio and video setup at the Lombard Church of the Nazarene, helping with audio, video, networking, and streaming solutions My role has also consisted of creating a functional website for the church. Additionally, the domain management consists of managing users in the Admin Console of the church's Google Workspace.

Web Developer

Lombard Church of the Nazarene - Remote
January 2023 to March 2023

Through the collaboration on this Google Site, I was required to adjust the entire site so that it would scale properly (this required a number of embedded portions of HTML, CSS, and JS). The DNS of the church domain was also updated with the proper CNAME, redirects, subdomains, and reconfiguring of email functionality. This website is live at www.lombardchurch.org.

Scanner Technician / Media Operator

Samaritan's Purse - Aurora, IL (On-Site / Seasonal)
November 2023 to December 2023

Managing 50+ CI scanners (IOS) and 2 to 6 Intermec CI scanners (Android), I was required to maintain, troubleshoot, and reset these devices. I was also required to control the sound system, screens, and computers of the Processing Center Warehouse.
